SEASPACE CORPORATION ANNOUNCES THE RELEASE OF RAPID MODIS PROCESSING SYSTEM (RaMPS)

Poway, California, February 18th, 2008-SeaSpace Corporation has just released its Rapid MODIS Processing System (RaMPS). RaMPS processes a MODIS pass in 12-15 minutes, as opposed to a standard processing system that can take up to 60 minutes a pass. It is available as a desktop or rack-mounted system. A premium version, PRaMPS, is available only as a rack-mounted system, and can process two to three MODIS passes in 12-15 minutes.

“RaMPS will be extremely useful to our research customers who need to process large amounts of data in a short amount of time,” said Dan Waltman, Senior Systems Engineer of SeaSpace.

To purchase RaMPS or to make inquiries, please e-mail the SeaSpace Sales Department at sales@seaspace.com or call (858)746-1138.

About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information.
