## **SEASPACE CORPORATION ANNOUNCES ISO 9001:2000 CERTIFICATION**

*Poway, California, August 2, 2004* – SeaSpace Corporation, recognized worldwide as the leading provider of ground stations for remote sensing satellites, announced today that it has received the prestigious ISO 9001:2000 quality management system certification on its first application.

The rigorous process of acquiring this certification demonstrates SeaSpace Corporation's commitment to providing its customers with the highest quality products and services, with results validated by an ISO accredited registrar. The ISO 9001 inspection process includes 23 different elements, from product design and development to production, inspection and servicing. SeaSpace complied with all ISO 9001 requirements on its first attempt.

Created by the International Organization for Standardization (ISO), ISO 9001:2000 is based on eight quality management principles: customer focus, leadership, involvement of people, process approach, system approach to management, continual improvement, fact based decision-making and mutually beneficial supplier relationships. The ISO 9001 designation is administered in the United States by The Registrar Accreditation Board (RAB). For more information on ISO and the certification process, go to the following web site: <http://www.nsf-isr.org>.

### About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information. These systems are in operation at more than 450 customer sites in over 30 countries. SeaSpace is a wholly owned subsidiary of The Allied Defense Group, Inc.
