SEASPACE CORPORATION INTRODUCES FIELD-PORTABLE SATELLITE GROUND STATION FOR GEOSTATIONARY METEOROLOGICAL SATELLITES

SeaSpace Introduces Field-Portable System Offering Real-Time Acquisition and Processing from Multiple L-Band Geostationary Meteorological Satellites.

Poway, CA., February 7, 2003 – SeaSpace Corporation announces its new Field-Portable TeraScan® Terminal (FPTT) product. The system provides users with real-time data products from L-Band geostationary meteorological satellites in a compact, rapidly-deployable configuration.

The Field-Portable TeraScan® Terminal consists of a 2.3m geostationary antenna, RF hardware and computer hardware transported in five ruggedized cases. The portability of the system allows it to be transported in HMMWV-sized vehicles, and to very remote locations.

SeaSpace delivered the first 10 Field-Portable TeraScan® Terminals to the U.S. Army in December, 2002. The FPTT systems have been specifically designed to meet the armed forces Joint Mission Interoperability requirement, enabling naval, air and ground forces to utilize identical equipment.

The FPTT is designed to complement current deployments of the Portable TeraScan® LEO Terminals being used by the armed forces to receive and process data from the NOAA and DMSP meteorological satellites. Additionally, the FPTT was developed to meet the requirements of Rapid Environmental Assessment and civilian Emergency Management / Disaster Recovery programs.

This new product is the culmination of over a decade of product development and deployment experience.

About SeaSpace Corporation:

SeaSpace Corporation is the world's leading provider of satellite ground stations and processing software for remote sensing applications. TeraScan® systems are in operation at more than 450 customer sites in over 30 countries. SeaSpace is a wholly owned subsidiary of The Allied Defense Group, Inc. For more information on SeaSpace Corporation or TeraScan® products and capabilities visit www.seaspace.com or email info@seaspace.com, or call 1-(858) 746-1100.

About The Allied Defense Group, Inc. (formerly Allied Research Corporation)

The Allied Defense Group, Vienna, VA. (AMEX: ADG) is a diversified defense and security firm, developing and producing conventional ammunition, sophisticated security systems, innovative training and simulation products, and mission-critical safety and environmental products, for markets in Europe, Asia, Africa, Antarctica, North America and South America.
