## KEVIN DAVIS JOINS SEASPACE CORPORATION AS DIRECTOR OF BUSINESS DEVELOPMENT

### SeaSpace Announces the Selection of Kevin Davis as the new Director of Business Development.

*Poway, CA., May 12, 2003* – SeaSpace Corporation has selected Kevin B. Davis as its new Director of Business Development. With 15 years of experience in the satellite earth station industry, Mr. Davis will complement the current team with his technical management expertise and overall market knowledge. “His experience providing satellite earth stations for remote sensing, as well as telemetry and control applications, makes him an extraordinary fit for our company and our technology roadmap,” said Linda Bernstein, President.

Prior to taking this position with SeaSpace, Mr. Davis directed the SMARTech Division of Jackson and Tull from 2000 until 2002. He founded SMARTech (Satellite Mapping and Resources Technologies, Inc.) in 1989 and served as its President for 10 years. In these positions, his experience included hardware and software product development; project management; manufacturing; quality control; installation, training and customer support; and sales and marketing.

“I am excited about the opportunities available to SeaSpace as we transition our ground station products to new remote sensing satellite systems, including ADEOS-II, METOP and NPOESS,” commented Mr. Davis.

Mr. Davis’ leadership and expertise will add value as the company transitions its TeraScan product line into the NPOESS era and beyond, including SAR and other high data rate missions.

“As SeaSpace continues its growth and expansion, we look forward to working with Mr. Davis as he participates with our existing leadership in the development and improvement of the TeraScan product line, and overall support to our customers,” Ms. Bernstein stated.

#### About SeaSpace Corporation:

SeaSpace Corporation is the world’s leading provider of satellite ground stations and processing software for remote sensing applications. TeraScan® systems are in operation at more than 450 customer sites in over 30 countries. SeaSpace is a wholly owned subsidiary of The Allied Defense Group, Inc.
