SEASPACE CORPORATION AWARDED CONTRACT TO SUPPLY A 2.4m X/ L-BAND AND 1.5 m L-BAND SYSTEM TO DMI

Poway, California, April 15th, 2008-SeaSpace Corporation announces the award for a TeraScan® 2.4m X/L-Band system and a 1.5m L-Band system for the acquisition and processing of NOAA, FY-1D, Metop, and NASA EOS satellites by the Turkish State Meteorological Service (DMI). DMI is the Turkish government bureau commissioned with producing the meteorological and climactic data pertaining to Turkey.

The new acquisition and processing systems are scheduled for delivery and installation in later this year.

"We are excited to welcome the Turkish State Meteorological Service to the group of distinguished meteorological offices that use TeraScan® for their data reception and processing needs," says Hyong Ossi, President of SeaSpace Corporation.

About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information. These systems are in operation at more than 450 customer sites in over 30 countries.
