SEASPACE CORPORATION AWARDED CONTRACT TO SUPPLY A 2.4m X/ L-BAND SYSTEM TO TELESPAZIO, ITALY

Poway, California, April 15th, 2008-SeaSpace Corporation announces the award for a TeraScan® 2.4m X/L-Band system for the acquisition and processing of NOAA, SeaWiFS, and NASA EOS satellites by Telespazio (www.telespazio.it) of Italy. Telespazio, member of the Space Alliance between Finmeccanica and Thales, is a world leader in satellite services including management of satellites to Earth observation services, satellite navigation, and broadband multimedia telecommunications.

The new X-Band acquisition and processing system is scheduled for delivery and installation in summer, 2008 at Matera Space Center. Matera Space Centre carries out Telespazio's activities relevant to the acquisition, processing and the archiving of acquired data from the main Earth observation satellites; from the production and distribution of images and data products to the development of applications and services.

"We are excited to be able to deliver a system to Telespazio that is compliant with the European CE mark certification," says Dr. Kota Prasad, Senior Applications Engineer of SeaSpace Corporation.

About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information. These systems are in operation at more than 450 customer sites in over 30 countries.
