SEASPACE RELEASES UPGRADE FOR TeraPGS

Poway, California, June 30th, 2008-SeaSpace Corporation announces the release of TeraPGS-II, an upgrade to the already popular TeraPGS software. Useful features include the ability for the administrator to easily select product output options such as colorbars, coastlines, and animations, in multiple output formats. Once set-up is completed, TeraPGS-II continually outputs publishable quality products, ready for users.

A future version of TeraPGS-II, due for release in the fourth quarter of 2008, will include an easy-to-use graphical user interface (GUI) and an expanded menu of options.

"TeraPGS-II is part of SeaSpace Corporation's goal to meet our customer's end-to-end data reception and processing needs," says Dan Waltman, Sr. Systems Engineer for Seaspace Corporation.

About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information. These systems are in operation at more than 450 customer sites in over 30 countries.
