### **SEASPACE CORPORATION AWARDED CONTRACT TO SUPPLY A 2.4m X/ L-BAND SYSTEM TO TRINIDAD AND TOBAGO INSTITUTE OF MARINE AFFAIRS**

*Poway, California, February 26, 2008*– SeaSpace Corporation announces the award for a TeraScan® 2.4m X/L-Band system for the acquisition and processing of NOAA, FY-1C, Metop, and NASA EOS satellites by the Trinidad & Tobago Institute of Marine Affairs ([www.ima.gov.tt](http://www.ima.gov.tt)). This is the second system acquired from SeaSpace by the Institute, in order to assist in their charter to conduct research in marine affairs and provide the data to the government of Trinidad and Tobago for conservation and resource management decisions.

This installation will allow the institute to carry out its CARICOM (Caribbean Community) designation of Remote Sensing Center of the Caribbean, and will assist in furthering research and application development for terrestrial and marine sciences.

“SeaSpace is delighted to assist the government and people of Trinidad and Tobago in their quest to further the practice of oceanography and meteorology,” said Eric Baptiste of SeaSpace.

#### About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information. These systems are in operation at more than 450 customer sites in over 30 countries.
